DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Inoue et al. (20030063321).

As to claim Inoue teaches a method for identifying image file using voice information, comprising the steps of:

Capturing an image with a digital camera;

Capturing voice keywords associated with the image;

Storing the image and the keywords; and

Searching the image data using the voice keyword (abstract; par.009-012;

Figs.1-5).

"[0044] The adaptor 103 has the following function as a function unique to the present embodiment: the adaptor 103 has a function to **voice-recognize** a voice message input through the microphone 203, **extract words** from the message, convert the words into text data, and attach them to the image **data as keywords for image searches and a title**"

"[0061] A phrase A in FIG. 4 indicates an example of extracting keywords from a speech that was input. When a user voice-inputs "Photograph of night view of Yokohama," the underlined sections, a (Yokohama), b (night view), c (photograph) of the phrase A in FIG. 4 are extracted by the voice recognition/keyword extraction section 303 as keywords (character string data). **These keywords will be used to search the desired image data (the image file) in the application server 108**"

as to claims 2-3, the camera in Inoue teaching is a digital camera used to take videos as well, Inoue also teaches where lists of image file are stored.

Claims 4-8 are analogous to claims 1-3 and are rejected by Inoue for the foregoing reasons.
